

Missing Child Reporting and Assessment

When a child in Out-of-Home Care (OHC) has been reported as missing, the National Center for Missing and Exploited Children (NCMEC) should be notified. Furthermore, when the child returns to OHC, an Assessment when a Child or Juvenile is No Longer Missing must be completed. In eWiSACWIS this is accomplished through the Missing Child Reporting and Assessment page.

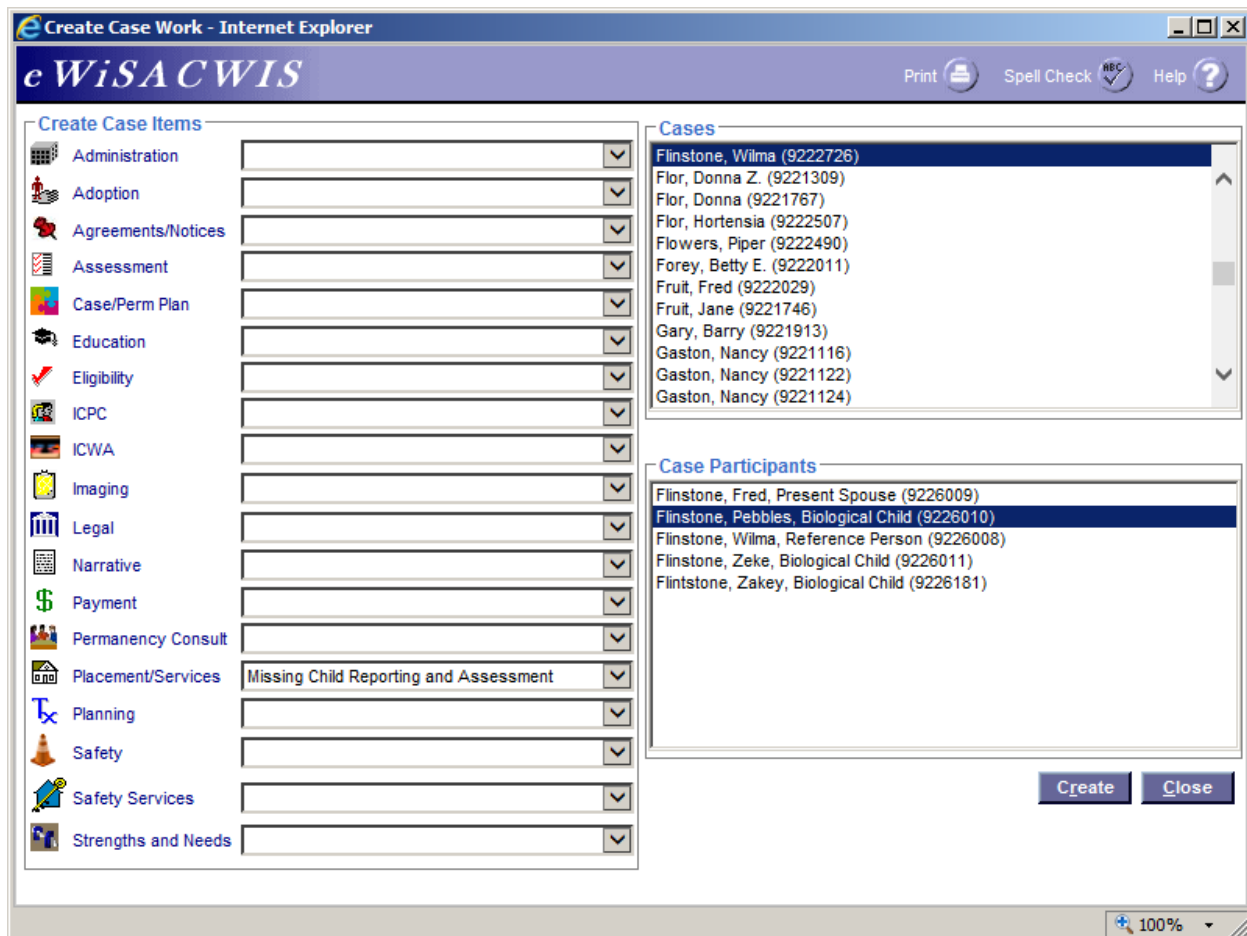

The Missing Child Reporting and Assessment page can be created from the Create Case Work page or from the corresponding Missing from OHC placement.

Note: The Missing Child Reporting and Assessment page and the report to NCMEC can be entered independent of entering the Missing from OHC placement. This allows the Report of Missing to be sent to NCMEC before the child's placement status has been updated.

Creating the Missing Child Reporting and Assessment page

To create from Create Case Work:

1. From the desktop, click Create > Case Work or click the Case Work hot button . This will open the Create Case Work page.
2. On the Create Case Work page, select Missing Child Reporting and Assessment from the Placement/Services drop-down. Select the Case and the Case Participant that is missing. Click on the Create button. This will open the Missing Child Reporting and Assessment page.

The Missing Child Reporting and Assessment page can also be created and accessed from the placement page.

Once a Missing from OHC placement has been saved, click the Missing Child Reporting and Assessment link on the Service Tab. For information on documenting a Missing from OHC placement, please see the Creating an Out of Home Placement User Guide.

Note: The Missing Child Reporting and Assessment page will also automatically launch on approval (for both worker and supervisor) of a Missing from OHC placement.

The screenshot shows the eWiSACWIS web application interface. At the top, the browser title is "Out of Home Placement - Internet Explorer". Below the header, the "Child" tab is selected, displaying case information: Child: Flinstone, Pebbles (9226010), Case Name: Flinstone, Wilma (9222726), and Request Number: .

The main content area is divided into three tabs: Service, Provider, and ICWA. The "Service" tab is active, showing the "Placement Information" section. This section contains several fields and checkboxes:
